DuraShock™ Aneroid Sphygmomanometer

Welch Allyn

DuraShock design is much more durable than traditional aneroids with gears. The DS45 features a unique integrated, cuff-mounted design that is compact and lightweight. Shock resistant to maintain accurate blood pressure readings with lower lifetime costs can withstand up to 30" drop and remain in calibration. Laser-engraved dial face for accuracy. Gauge rotates 360° for easy viewing and snaps directly into cuff for quick cuff change. 10-year calibration warranty. Large inflation bulb and high-quality air-release valve make inflation easy. Latex-free. Premium Tyco valve ensures long life and smooth, even deflation. Large, premium inflation bulb (on Adult and Large Adult sizes) reduces the number of pumps required to inflate cuff.

Genius™ 2 Tympanic Digital Ear Thermometer

Medtronic

The Genius™ 2 thermometer uses its proprietary Peak Select System™ technology to determine the body's accurate temperature directly from the tympanic membrane. Peak Select System™ technology records and analyzes up to 100 temperature measurements and selects the most accurate reading in one to two seconds. Redesigned, tapered probe tip facilitates proper ear canal alignment, minimizing technique-related errors and increasing patient comfort. Rugged, tip-based sensor construction improves durability and accuracy, minimizing the need for recalibration. No-touch probe cover application and ejection reduce potential cross contamination. Programmable display shows oral, rectal, axillary and core or an absolute temperature reading in ear mode.

AdTemp™ 427 Digital Temporal Thermometer

American Diagnostics

Non-invasive forehead temperature measurement using patented conductive technology delivers clinically accurate readings in about 6 seconds. Reduces the risk of cross contamination and avoids the need for costly probe covers. Audible tone when measurement is complete. Last reading memory. 2 AAA batteries. Large Backlit display, Fahrenheit/Celsius, Hand-held, Temporal Infrared Probe.

Description	Packaging	Sold By	Item ID
Digital Temporal Thermometer	Each	Each	427

Exergen Temporal Scanner Thermometer

Exergen

The TemporalScanner Thermometer has been clinically tested for accuracy compared to rectal thermometers and temperature sensors inserted in the heart during course of patient treatment and accepted for use in major hospitals, making it the ideal thermometer for use with newborns, infants, children or adults. This unique process determines temperature by accurately measuring the balance between the tissues warming from arterial blood and tissues cooling (warming) caused by heat loss (gain) to the environment. Silver Ion Antimicrobial Head - destroys bacteria, mold, mildew and fungi... naturally and safely - Probe covers not required.

Description	Packaging	Sold By	Item ID
Digital Temporal Thermometer*	Each	Each	140008

LinkTemp No-Contact Infrared Thermometer

Links Medical

Provides quick and accurate measurement of core body temperature. No probe covers required. Performs up to 100,000 readings. No contact with skin reduces the risk of contamination. FDA cleared, clinical grade thermometer. Non Contact Reading in 1 second from 1.2-2" from forehead. Two Color Backlit LCD. Stores the previous 32 temperatures. Temperature can be displayed in F or C.

ADC AdView® 2 Diagnostic Station

American Diagnostics

The ADC ADView 2 easily captures automated blood pressure measurements at the touch of a button. Our non-invasive blood pressure base unit module uses the oscillometric method, with both pulse rate and the mean arterial blood pressure (MAP*) displayed in about 30 seconds. With seven available cuff sizes, ranging from child to thigh, the ADView 2 can be used for patients ages three and older. Adult Plus and Large Adult Plus cuffs come standard.

The ADView 2 is still the only truly modular diagnostic station that grows with your needs. Choose temperature or pulse oximetry options at the time of purchase and we'll ship your ADView 2 fully configured and ready to go. Or add new modules in the field, anytime, as you need them. Our user-expandable, connect-and-go construction makes upgrading effortless.

Ear Wash System

Welch Allyn

Turn cerumen removal into a clean, quick, safe procedure with the first system to simultaneously irrigate and suction discharge using hydrovac action. With built-in safety features, the Ear Wash System is ideal for use on patients of any age. Eliminates messy outflow by automatically dislodging and disposing of cerumen. User controls monitor suction, water temperature and pressure. Transparent tip directs outflow back to sink and away from you and your patient. Can help reduce side effects like vertigo, nausea, and tympanic membrane damage.

Seca Flat Scale With Cable Remote Display

Seca

A 6.5 foot cable connects the display with the weighing base. Advantage: the display can be set up separately from the base and read from its position on the wall or desk. Additional convenience is supplied by the many extra weighing functions: BMI for nutritional conditions, HOLD to keep measurements displayed and TARE for weighing small children held in an adult's arms. It is suitable for stationary or mobile use thanks to its handle, compact size, low weight and a leveling base for set-up on all types of surfaces. 550lb. weight capacity. Dimensions: 12.6 x 2.4 x 14.0 inch.

Description	Packaging	Sold By	Item ID
Flat Scale With Cable Remote Display*	Each	Each	869 1321 004

Seca Digital Platform Scale with Wireless Transmission

Seca

This battery-operated digital scale has been especially developed for weighing obese patients, with a weighing range of up to 800 lbs and a non-slip 22 x 22 inch platform, only 2.2 inch high – a sturdy base for overweight or obese patients. A chair may also be used on the scale and will not influence the weighing result due to the Pre-TARE function. The cable remote display (cable length: 98.4 inch) with easy-to-read LCD can be held, wall mounted or placed on a table. The 0.1 lbs graduation means that the smallest changes in weight are registered, even after the patient has left the scale – thanks to the Auto-HOLD function. The integrated Body Mass Index (BMI) function and the seca 360° wireless technology, which can be used to transmit the measurements to a seca wireless printer or PC at the push of a button emphasizes the many uses of this unique multifunctional scale.

Seca Chair Scale

Seca

With a capacity of 440 lbs and a graduation of 0.2 lbs, the seca 952 fulfills all basic medical standards. Added to that are the typical seca advantages such as fold-up armrests and footrests, secure wheel brakes, an ergonomically shaped seat and smooth rollers, which, together with the ergonomically shaped handle, make it very easy to push the chair scale. Of course the seca 952 is also equipped with the important TARE function which allows every newly added weight to be ascertained separately and the Auto-HOLD function which lets medical personnel take care of the patient first and read out the results later.

Description	Packaging	Sold By	Item ID
22.2 x 35.3 x 37.6 inch (6 AA Batteries)*	Each	Each	952 1309 009

Seca Digital Chair Scale

Seca

Care and comfort were kept in mind when designing the stable model with a circular steel tube frame. The comfortable seat provides a safe position while the swiveling armrests and adjustable footrests make the chair scale more user-friendly. The locking rear wheels ensure that it is safe to sit down and stand up at all times. The positioning of the large LCD display unit behind the chair permits intuitive operation of functions TARE, HOLD and BMI. At the press of a button, the seca 360° wireless technology transmits measurements to a seca digital printer with wireless reception or a PC. This mobile chair scale, which can be operated by a rechargeable battery. 660lb. weight capacity.

Seca Digital Multifunctional Handrail Scale

Seca

Equipped with an extremely low-level, easy-access platform, a stable handrail, and high weight-bearing capacity, this multifunctional scale ensures safe and comfortable weighing of heavy patients. The integrated handrail provides the patient with support throughout the weighing process – or a chair can be placed on the generous platform for the patient to sit in. The Pre-TARE function with three memory cells automatically deducts a stored weight (such as a chair) to determine net weight. The seca 644 is also equipped with seca 360° wireless technology which can be used to transmit the measurement results wirelessly to a seca digital printer with wireless reception or the seca software on a PC. In addition, the device is made mobile by two rubber wheels and a power supply provided by rechargeable batteries or power adapter. When the scale is connected to a printer, the time of weighing and the patients weight are automatically recorded and printed by the time module. 800 lb. weight capacity.

Seca Digital Wheelchair Scale

Seca

With its high capacity of 800 pounds, the seca 664 makes it easy to weigh even heavyweight. Easy access is assured by its extremely low platform and the self-lowering ramps. The secure side rails give additional safety. An integrated Pre-TARE function determines in seconds the net weight of the patient by utilizing internal weight memory. All the data can be transmitted wirelessly to a seca printer or PC immediately after weighing. The swiveling LCD with large letters is easy-to read both for the patient and for the caregiver. The seca 664 can be folded up in no time and can be transported anywhere, thanks to its roller castors. 800 lb. weight capacity.

Description	Packaging	Sold By	Item ID
43.4 x 35.9 x 45.3 inch (Power Adapter, Rechargeable)*	Each	Each	664 1321 103

Seca Digital Multifunctional Scale

Seca

The patient can be safely and accurately weighed while standing, seated or in a wheelchair. No conversion is required. The stable handrail supports the standing patient, the integrated fold-down seat provides comfort for the seated patient, and the large platform (31.5 x 33.1 inch) accommodates a patient in a wheelchair. The weight of the wheelchair or walker is simply deducted with use of the Pre-TARE function. Special attention has been given to making the scale easy-to-access and safe, with a stop barrier provided for the front wheels of the wheelchair. Additional details: easy-to-read swiveling display can be turned toward patient or caregiver, the practical HOLD function shows the weighing result after the patient has left the platform, the damping function ensures precise results, the non-slip rubber coating and handrail guarantee a firm foothold and integrated transport castors make the scale mobile. Just press the SEND key to transmit measurements wirelessly to a seca digital printer with wireless reception or the PC. 800 lb. weight capacity.

NOA Bariatric Elite Bed

NOA Medical

NOA Medical has once again responded to the requests of the market and designed a Bariatric Bed that is reasonably priced and will accommodate virtually all of the Bariatric Bed requirements in your facility. There is no longer any need to rent a "hospital" bed for your larger residents. The new NOA Bariatric Elite Bed is designed for 800 pound work load, and is sturdy throughout, with four motors providing the typical high/low, head and knee functions found on better resident room beds. We are so confident of the strength of the bed that we will warranty the deck for life. In addition the NOA Elite Bariatric Bed is priced with our "White Glove Service" (includes set up and delivery to the facility). Features: 80" and 84" adjustable sleep deck, Safety Lock for Immobilization, Soft-Touch Side Rails, High density polyethelene head & foot boards, transport trolley system, Mattress, and Lifetime warranty on welds.

EasyCare® Bed Frame

Joerns

The revolutionary EasyCare is a fully configurable healthcare bed offered at price points ideal for care facilities of any size. Enhanced functionality and mobility features allow the bed to be configured to meet a variety of needs - for the both the patient and caregiver. Create the bed that works best for your patients and facility with features such as best-in-class integrated width expansion, pedal locking system, reinforced sleep deck, redesigned panel retentions, and new mattress corner stops that adjust with the bed width. Intuitive two-pedal locking system is centrally positioned at the foot end of the bed and easily visible due to color-coded status indicators. Integrated Width Extension provides a sleep surface that expands and retracts from 35 in, 39 in and 42 in and quickly adjusts to move through doorways, while compliant to HBSW entrapment guidelines. Corner mattress stops provide greater security of the mattress surface and easily adjust to the expanded widths of the frame. A restructured and more robust sleep surface and panel mounting mechanism designed to provide added stability and extended product life. 500lb. safe working load.

Geo-Matt® Foam Mattress Overlay

Span America

The #1 selling therapeutic overlay in the US, Geo-Matt is used by thousands of hospitals and nursing homes nationwide. The top surface is cut using our exclusive Geo-Matt design, which creates more than 800 individually responsive foam cells that are anatomically sized to the area of the body they carry. This zoned design delivers the ideal support characteristics needed at the head, torso, and lower extremities. By independently absorbing pressure points, the cells allow the Geo-Matt to customize its support to the body's natural curvature while minimizing the effects of pressure and shearing. In addition, Geo-Matt's exclusive "Ring-of-Air®" feature helps to ventilate the surface, channeling heat away from the patient to minimize perspiration build-up. Weight limit: 250 lbs.

PressureGuard® Easy Air™ & XL Treatment Mattress

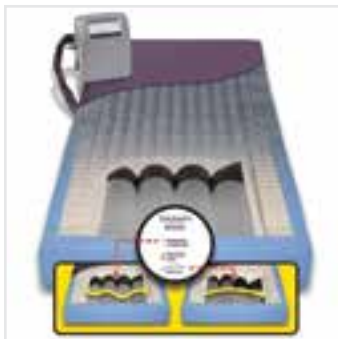

Span America

Clinicians choose low air loss systems to address maceration, the weakening of the skin due to excess moisture. Easy Air won’t lose inflation in a power outage. Its stable surface won’t “swallow up” the user. And its Safety Edge™ won’t collapse like air-only mattresses can, making transfers safer. It won’t make the user too hot or too cold, either. Ultra-simple to set up, clean and use. Dial sets the comfort level. “On/off” buttons control air flow and alternating pressure feature. 500lb. weight capacity. 2-year non-prorated warranty.

The Easy Air low-air-loss design, documented best among leading low air loss systems is accessible to bariatric patients in the PressureGuard Easy Air® XL. These technical innovations set the Easy Air XL apart among bariatric surfaces by effectively addressing the effects of pressure, shearing, friction, heat buildup, and maceration. 2-year non-prorated warranty. Weight limit: 1000lb.

PressureGuard® Easy Air™ LR Treatment Mattress

Span America

Low-air-loss Therapy with Alternating Pressure or Lateral Rotation. All of the most needed features in one surface. Start with the popular PressureGuard Easy Air, the low-air-loss surface independently documented to outperform every leading low air loss system in moisture removal. Add the alternating pressure and lateral rotation modalities found in the effective PressureGuard APM2. 2-year non-prorated warranty. Weight limit: 500 lbs. in FLOAT and ALTERNATING, 350 lbs. in ROTATION.

The introduction of recessed deck versions of selected Span surfaces, including the Easy Air LR, brings our advanced technology to recessed deck beds. V-shaped edges enable the mattress to fit the recessed deck bedframe, while the compressible section accommodates multiple lengths and foot positions.

PressureGuard® Protocol™ Treatment Mattress

Span America

Span-America's PressureGuard Protocol™ provides caregivers an unmatched combination of microclimate management, pressure redistribution, ease of use and patient/caregiver safety. Protocol's proprietary air delivery cover design supplies a gentle flow of air directly to the underside of its highly vapor permeable coverlet, carrying away excess moisture vapor to help protect vulnerable skin. The Protocol's efficient control unit generates substantially less heat and noise than traditional high-output low air loss blowers while consuming less power. Caregivers can select subtle alternating pressure or powered flotation treatment modes. Auto firm mode provides additional surface stability for ADLs, transfers, and feeding when desired, then automatically resumes the selected treatment mode after 20 minutes. Unlike typical roll-up surfaces, Protocol can maintain its inflation in a power outage or during transport. System includes mattress, control unit and machine washable coverlet. 18-month warranty. Weight limit: 400lb. (500lb. for 42")

Description	Packaging	Sold By	Item ID

The Topper MicroEnvironment Manager™ Coverlet

Span America

Span-America introduces The Topper, the industry's first completely reusable powered air coverlet for management of excess heat and moisture within the microenvironment. The Topper is powered by the same, patented Air Diffusion Matrix™ technology first pioneered in the company's category-leading microclimate management support surfaces. The system provides a gentle flow of air directly to the underside of its highly vapor permeable top layer, carrying away excess moisture vapor to help protect vulnerable skin. System includes: Air cover, powered control unit, and carrying bag. 24-month non-prorated warranty. The Topper accommodates 500lbs on 36" wide, 750lbs. on the 42" wide, and up to 1,000lbs on 48" wide versions.

PressureGuard® APM² Treatment Mattress

Span America

With its two distinct therapy modes, the PressureGuard APM² gives you twice the treatment options. Twice the flexibility. Twice the value. And now enhanced cover and control unit features as well. An upgraded cover design and control unit now provide even greater immersion, envelopment, shear reduction, treatment flexibility, caregiver ergonomics and user comfort. Change instantly and easily from alternating pressure to basic lateral rotation with a single, recessed toggle switch. Requires no disconnecting or exchanging of air lines. The dependable digital control unit is lightweight and quiet. The easy-to-use, white multi-functional control unit provides simple, indexed comfort adjustment and a selectable audible alarm. A timed (20 minute) "Auto Firm" mode facilitates caregiving activities such as transfers, ADLs and CPR and then returns to its previously selected mode. 18-month all components warranty. Weight limit: 350lbs.

PressureGuard® APM Treatment Mattress

Span America

On top, the Geo-Matt anti-shearing surface forms a comfortable, therapeutic interface between the air system and the user. It absorbs and smoothes sharp pressure drop-offs that other surfaces can't, while the air system does the "heavy lifting" below, alternating weightbearing across the surface in ten-minute cycles. Other standard PressureGuard features include the exclusive Heel Slope taper, and two-part Safety-Edge bolster system for added stability when sitting or transferring. 18-month non-prorated warranty. 350lb weight limit. Bariatric weight limit 750lb.

PressureGuard® Custom Care® Convertible Mattress

Span America

The revolutionary part of the PressureGuard® Custom Care® Convertible and Convertible LAL surfaces starts deep within the surface, in the Star Chamber air cylinders. Far more than foam-filled “air” systems, the Star Chamber design creates a true air system that is constantly filled with air - whether or not the surface is powered. While they can be somewhat effective, foam-filled systems are limited by physics. But true air therapy provides the pathway to dramatically improved outcomes. It all starts with what’s on the inside. Warranty: Mattress - 5 years, non-prorated. Control Unit - 2 years, non-prorated. Weight limit 500lbs. (non-powered), 350lbs. (powered).

PressureGuard® Custom Care® Non-Powered Mattress

Span America

This model is a non-convertible surface in the Custom Care® series which includes the Custom Care Convertible and the Custom Care Convertible LAL models. The Custom Care surface incorporates the cover and outer shell design innovations found in the convertible series, but with a support cylinder design similar to typical non-powered reactive systems. PressureGuard Custom Care provides effective, non-powered pressure redistribution through its outstanding combination of a zoned, shear-reducing, engineered outer shell surrounding a reactive support chamber system. 5-year all-component warranty. 500lb. weight limit.

Geo-Mattress® Atlas™ Foam Mattress

Primary Products

Supporting up to 750 pounds, the Geo-Mattress Atlas is designed to meet the unique skin integrity challenges of the bariatric client. Its therapeutic top layer features the exclusive Geo-Matt design. Its 800 independent support cells protect against the damaging effects of friction and shearing. Beneath it, three high resiliency layers offer progressively firmer support. This multi-tier design puts the most patient-friendly surface directly next to the skin, and the most dense material farthest away. Protected by a fluid-proof cover, and a non-prorated three-year warranty.

Geo-Mattress UltraMax™ Foam Mattress

Span America

UltraMax is built for extreme comfort with 3-Dimensional Zoning™ core design providing anatomically-calibrated levels of support and immersion throughout the surface. Repeated head of bed elevating and the patient's concentrated weight combine to expose the seat section to the highest level of mechanical fatigue. UltraMax™ distinguishes itself by offering unmatched protection from "bottoming out". A unique cellular structure gives UHP 500 a combination of resiliency, recovery and comfort not achievable with any of the foams commonly used in medical support surfaces. The UltraMax™ bi-directional stretch cover with Shear Transfer Zones™. 8-year warranty.

Hoyer® Elevate® Patient Lift

Joerns Healthcare

The Elevate® is an active lift designed to improve the lifting experience for both the caregiver and the patient. It is compact and sturdy with a Safe Working Load of 440 lbs. Included is Smart Monitor technology that displays actual lifts as well as reminds you to recommended service. This helps drive user compliance and keeps your HPL500 in top shape! The Elevate incorporates key intuitive features for caregiver safety. These include a spring-loaded lever to adjust kneepad height as well as a rubber push pad designed to initiate lift movement eliminating initial push forces. The Elevate has been designed to be configured either with or without a weigh scale. The weigh scale is seamlessly integrated with a digital display and user friendly controls. 2-year warranty.

MedCare® Lift Commode Slings

Medcare Products

The Commode sling is used for transferring a patient to and from the toilet/commode. Toileting of a patient using the commode sling requires a certain degree of physical and mental ability on the part of the resident. Caregivers should assess the physical and mental abilities of an individual prior to using the commode sling. Such factors may include, but are not limited to: proper trunk control, awareness, and ability to follow instructions. Sling is made of mesh and disposable material. Made from rip-stop polyester - if punctured or torn, it will not rip. 4-point hook up — attaches to any 2 or 4-point hook and loop sling attachment system.

Medication Furniture Mobile Wood Carts

Harloff

Harloff wood medication furniture and resident medication cabinets provide an attractive alternative for assisted living & long term care facilities looking to soften their institutional appearance. Culture change initiatives in Long Term Care encourage homes to move away from traditional style medication carts to options with the look of medication furniture. Harloff products were purpose designed to meet industry standards for security and function. Our in room medication cabinets include slam locks needed for a one hand open and close and drop down shelves that provide work areas. The wood vinyl and wood laminate mobile medication carts look like a piece of furniture but have the internal design and locking system to meet the demands of Long Term Care use.

Unit Dose Med Carts

Harloff

Harloff's Unit Dose Medication carts are designed to accommodate unit-dose boxes and pharmacy automation and bar-coding packaging systems. This cart is also OPUS® and Opti-Pak® compatible. Harloff unit dose med carts include internal drawer dividers, pull out shelves and narcotics storage as standard features. Our divider sets can be changed to meet the size requirements of your medication packaging. Medication carts with a two column design are preferred by nurses for their ease of use. The narcotics and liquid storage in this med cart is separated from the rest of the cart. This allows for easy access as needed. Standard Line has Painted Steel Cabinet with Aluminum Drawers. OptimAL carts feature Painted aluminum cabinet and drawers. Keyed Locks.

Span America

Unique segmented fins are specifically engineered to address the effects of reclining-induced shearing that is typical of institutional seating. Patented design has three distinct zoned orientations to reduce shear in multiple directions for specific seating areas. Use of this cushion also helps to reduce pressure when the user is in the upright or reclined position. 18-month warranty.

The Heel Manager™ Offloading Elevator

Span America

Effective offloading is essential for the care of the bony prominence in the heel – one of long-term care's vulnerable tissue sites. In addition to fully offloading both heels, the Span-America Heel Manager's gentle slope aids in circulation - key for patients with diabetes, neuropathy, and peripheral vascular disease. The 30 percent larger, tissue-friendly, dual layer design with ultra-high performance foam supports the calves with new levels of comfort and stability. Includes Shear Transfer Zone™ Cover technology.

Heel Float® Boot

Skil-Care

Floats the heel over an air cavity for zero pressure. Provides air circulation to aid healing of existing ulcers. Foam cushioned sides protect lateral and medial malleoli. Water-based gel insert lowers pressure beneath ankle. Cozy Cloth cover reduces skin shear and wicks away moisture. Anti-foot-drop construction controls dorsal flexion. Launderable, reusable, and guaranteed for six months. Hook and Loop Strap Closure.

Silicore® Hook & Loop Strap Foot Pillows

Spenco Medical Corporation

Relieves foot, heel and ankle pressure. Made with SPENCO® SILICORE® fibers, unique siliconized hollow core shafts that don't mat down, retain their loft and allow air flow. The silicone coating lubricates each fiber to reduce friction and shear force while preventing moisture penetration or retention. The breathable cotton/polyester fabric is fully washable, dryable, and radio-translucent. One size fits all, with VELCRO® brand closure.

Swift Slider™ Transfer Sheet

Encompass Group

The Swift Slider Patient Positioner was specifically designed to support the microclimate of patient skin. It is constructed of two layers; a 50/50 cotton polyester twill surface and a thin, breathable taffeta backing. The breathable backing and thin profile ensure that the device will not affect the pressure redistribution properties of therapeutic support surfaces as confirmed by pressure mapping study data conducted in early 2010. Consequently, the Swift Slider can remain under the patient throughout their stay as long as needed without comprising skin integrity. Surface: 50/50 cot/ply twill. Backing: Light blue taffeta. Dimensions 72"x40".

Wire Glove Box Holder

Innovative Medical

Conserve counter space with the Dispensa-Glove Universal Glove Box Holders. The standard and large glove box holders firmly hold two boxes upright or one box lying down. The all-steel construction with white powder coat finish comes with a lifetime guarantee. The open design allows you to see what size or type of glove is being dispensed. The holders accommodate most glove boxes and are universal enough to be used for many tissue boxes as well. The units install in seconds with the included mounting hardware. Can be mounted horizontal or vertical.

CaviCide® Disinfectant Liquid

Unimed-Midwest

Effective against TB, HBV, HCV, viruses (hydrophilic and lipophilic), bacteria (including MRSA and VRE) and fungi. It is safe for all areas of the facility including NICU, operating rooms, isolation rooms, patient care areas and laboratories. When used as directed, it will also effectively clean and decontaminate critical and semi-critical instrumentation.

24 oz. Spray	12 Bottles/Case	Bottle	12024

CaviWipes® Disinfecting Wipes

Unimed-Midwest

The power of CaviCide®, in a wipe. Pre-saturated with CaviCide®, CaviWipes™ are the only cloths proven to kill both TB (in 5 min.) and HBV (in 3 min.) with quick, easy-to-use, timesaving convenience. Durable, nonwoven, nonabrasive towels that won't bunch up during use. Better surface contact than other wipes, requiring less force to apply solution to a surface. Recommended for use on nonporous surfaces and fixtures and are perfect for operating rooms, surgical centers, neonatal units, medical and dental operatories and other critical-care areas.

Dispatch® Clorox Bleach Disinfectant

Clorox

Trusted by more hospitals than any other ready-to-use bleach products for killing C. difficile spores. Dispatch is premixed, ready to use and is equivalent to the 1:10 bleach solution strength that is recommended by CDC guidelines for effective disinfecting. Dispatch contains an anticorrosive ingredient that makes it less damaging to surfaces or equipment than conventionally prepared bleach solutions. It is stable and pleasant to use. Dispatch remains stable through expiration date on the package. EPA-registered to kill C. difficile spores in 5 minutes, use as directed on pre-cleaned, hard nonporous surfaces.

Clear Can Liners

Pitt Plastics

Clean can liners are becoming increasingly popular in areas where recycling is prevalent, because they allow quick and easy visual confirmation of visibility to prevent unwanted disposal and help prevent pilferage of items that could be concealed in opaque liners. This is Pitt Plastics' highest quality clear can liner. Vu-Thru liners are produced with only the highest quality virgin resins.

High Density Natural Can Liners

Pitt Plastics

High Density Mini-Rolls provide answers to questions of environmental responsibility as well as cost efficiency. The unique blend of first grade high molecular weight High Density Polyethylene and LLDPE resins is puncture resistant, possesses impressive film strength, and performs under temperature extremes of -40F to 212F. The high molecular weight of the High Density Polyethylene resin allows can liners to be produced that are approximately one-third the weight of traditional can liners with the same capacity. A lower weight bag of superior strength means less material is being used in production, making the High Density Mini-Roll a good choice when searching for a product sensitive to source reduction responsibility.

Tena® Youth Brief

Essity

Youth Brief offers moderate to heavy urine and/or fecal incontinence protection. It has a comfortable design and soft textile-like material for comfort and discretion. The curved leg elastics and the elastic waist band ensure user comfort and leakage protection. The incontinence product is easy to fasten and adjust multiple times to achieve a perfect fit, protection and high comfort. FeelDry technology rapidly wicks away even large quantities of urine into the product core. The urine remains locked in the core even under pressure, keeping it away from the skin, for enhanced comfort. Medium/Heavy absorbency.

TENA® Dry Comfort Protective Underwear

Essity

Tena Dry Comfort Protective Underwear are super comfortable and high quality incontinence protection underwear at an affordable price. They are designed for everyday use for moderate bladder/urinary incontinence protection. Tena Dry Comfort Protective Underwear provide full coverage and have a soft cloth-like breathable material that has the look, feel and comfort of regular underwear. They are highly discrete as they are effective at capturing leaks, but the core is 20% thinner than current products. Tena Dry Comfort Protective Underwear have many features to maximize comfort and protection. They have soft waist elastics that provide a secure and comfortable fit, They utilize super absorbent polymers to quickly lock away moisture and odor for effective leakage protection. The targeted acquisition zone wicks moisture into the absorbing core and locks it away to promote skin dryness and health. They also have tear away sides to make removal easy, clean and comfortable. For convenience they have blue waist elastics to indicate which side is the back of the underwear and size printing for correct product selection and ideal body fit.

Flush Away™ Flushable Washcloth

Dynarex

Dynarex introduces a breakthrough in a new premoistened wipe that is flushable and dispersible. Dynarex uses advanced technology unlike regular wipes which are only flushable because they are small enough to leave the bowl. What makes our product unique is its dispersibility: it easily breaks down back to fibers as it goes through the pipes. As an additional advantage, our product has cellulose fibers and is biodegradable. Safe to flush, convenient to use, safe for use on patients skin, pH balanced and alcohol free, Cleans and moisturizes, Soothes with the touch of aloe.

Proshield® Plus Skin Protectant

Healthpoint

PROSHIELD® Plus Skin Protective Cream is a unique skin protectant that offers protection and adherence qualities that rival products with zinc oxide, but is as easy to apply and remove as petrolatum-based products. It can be applied over an antifungal and can also be used to prevent diaper rash on pediatric patients. Proshield Plus provides a moisture barrier that protects from irritation due to fecal and urinary incontinence. To treat patients with yeast infections. Protects chapped, cracked and dry skin. Greaseless and fragrant free. Suitable for daily use.

Lantiseptic® Skin Protectant

Santus

Protect skin and promote healing with lantiseptic skin protectant. Lantiseptic skin protectant is an emollient ointment intended to protect chafed or ulcer prone skin, promote the healing of skin injuries and serve as a first aid treatment. It is formulated to encourage the proper moisture balance of the skin, thereby supporting the body's natural healing process. This unique high lanolin formula can be used for preventing and treating a wide variety of skin conditions. Skin conditions include diaper dermatitis, ulcer prone skin, incontinence associated dermatitis, reddened or cracked skin and burns or other skin injuries.

Remedy® Olivamine® Calazime Skin Protectant Paste

Medline

Remedy™ Calazime Protectant Paste: Zinc oxide-based barrier that protects against moisture and minor irritation. Menthol cools irritated skin and calms inflamed tissue. Calazime™ also dries light exudates from compromised skin. Contains rich emollients (cold-pressed sunflower seed oil and organic olive oil) to easily spread the product onto the skin. Active ingredients are Zinc Oxide (20%) and Menthol (-1/50%).

Chamosyn™ Skin Protectant

Links Medical Products

Chamosyn is a superior skin barrier that provides long-lasting protection that nourishes the skin, stimulates blood flow, relieves discomfort, and calms inflammation. That's because it is specially formulated with two active ingredients: Zinc oxide seals in moisture and protects the skin from irritants that put skin at risk for breakdown. It dries light exudate from compromised areas and adheres to weepy, macerated skin. Menthol is an analgesic that helps stimulate the nerve endings, relieving burns, itching, and any local discomfort. Chamosyn is also enhanced with Aloe, Chamomile and Manuka honey. Easy to apply and remove.

Aloe Vesta® Skin Protectant

ConvaTec

ConvaTec Aloe Vesta® Protective Ointment 8 & 20 oz Tube. The petrolatum-based ointment is easy to apply. It provides an effective barrier that seals out moisture, contains emollients to moisturize and is non-sensitizing and fragrance-free. Soothes red, sore or irritated skin from urine burns, diaper rash, feces and other irritants. Provides protection as a moisture barrier. Conditions the skin while repelling moisture. Most useful in areas of the body that are frequently exposed to moisture. Suitable for common sites of maceration, including perineal skin, breast/skin folds, skin surrounding wound sites, skin surrounding tube or drain sites, and between the toes.

Dispatch® Clorox Bleach Disinfectant

Clorox

Trusted by more hospitals than any other ready-to-use bleach products for killing *C. difficile* spores. Dispatch is premixed, ready to use and is equivalent to the 1:10 bleach solution strength that is recommended by CDC guidelines for effective disinfecting. Dispatch contains an anticorrosive ingredient that makes it less damaging to surfaces or equipment than conventionally prepared bleach solutions. It is stable and pleasant to use. Dispatch remains stable through expiration date on the package. EPA-registered to kill *C. difficile* spores in 5 minutes, use as directed on pre-cleaned, hard nonporous surfaces.

N95 Particulate Respirator Mask

Primary Products

The N95 Particulate Respirator is a NIOSH approved N95 particulate respirator that meets guidelines for TB exposure control and is indicated for use when treating patients with airborne diseases such as TB or Influenza. The facial lock allows total facial closure for "custom fit" on any size face when donned correctly using the unique latex-free elastic retention bands. The traditional pleated design saves inventory space, cannot be crushed when stored, and is easy to carry with you. The soft, comfortable materials throughout are fluid resistant.

Pro-Stat® AWC Protein Supplement

Nutricia

Medical Nutrition Pro-Stat® AWC (Advanced Wound Care) is pure liquid protein that is predigested by papain, a fruit enzyme, creating a hydrolysate. It is a hydrolyzed, enriched collagen protein providing a naturally occurring high nitrogen mix of all Essential, Conditionally-Essential and Non-Essential Amino Acids with added L-Arginine, L-Cystine, Zinc and Vitamin C. It increases absorption and assimilation because the large protein molecules are broken down into free amino acids and polypeptides. Medical Nutrition Pro-Stat AWC is a liquid, concentrated protein formula fortified with L-Tryptophan. Clinically proven to have a 96% greater healing rate for pressure ulcers. Eliminates costly waste of unconsumed supplements. Can also be used as a food fortifier.

Fiber-Stat® Natural Supplement

Nutricia

Looks and tastes like water, but delivers 15 grams of natural soluble fiber per 2 tablespoons for gentle and reliable bowel regulation and prebiotic intestinal health. Taken straight or added easily to foods and beverages. Provides the highest amount of fiber per fluid ounce without the unpleasant taste, texture and grittiness often associated with fiber supplements. Does not affect medication absorption. Medical Nutrition Fiber-Stat assists in meeting the RDA requirements for fiber. Can be added to any food or beverage and can be administered via feeding tube. Prune Flavor can be taken straight or mixed with beverages or foods. Does not interfere with drug/nutrient absorption. Helps reduce or eliminate harsh bowel medications.

Compat® Triple Port Gastrostomy Tube

Nestle Nutrition

The Compat® replacement balloon gastrostomy tubes are developed with nursing input for long service life. The tube has special features to simplify care and maintenance. The Stretch-Lok® strap secures the feeding administration set to the tube, and its extra-large side port permits the use of a catheter-tip syringe to flush or administer fluids. Durable balloon provides longer service life. Flow-thru tip designed to reduce clogging. Sliding retention disc with aeration holes that reduce exit-site irritation and internal ridges that grip the tube shaft to prevent inward tube migration. External graduations and radiopaque stripe permit precise monitoring of tube position. Clear silicone allows visual monitoring of formula flow. Available in a variety of sizes to meet your enteral delivery needs.

Adapt Skin Barrier Paste

Hollister

This is used to fill or caulk uneven skin contours to create a flatter surface. It can help to prevent drainage from getting under the ostomy skin barrier. It may help extend the wear time of the skin barrier. Easy-to-squeeze tube. Red cap. Contains alcohol. Serves as a caulk, not a glue or adhesive. Not made with natural rubber latex.

MiraLAX Powder 850g 50-Day Laxative

Parmed Pharmaceuticals

MiraLAX works naturally so you can take it with confidence at your first signs of constipation, since it's clinically proven to provide gentle, effective relief with no harsh side effects. MiraLAX is gluten and sugar free. It easily dissolves completely in four to eight ounces of water, fruit juice or any other beverage. There's no taste, no grit, just gentle predictable relief with no harsh side effects. MiraLAX contains polyethylene glycol 3350 which is a completely different way to treat constipation. It works by gently replenishing the water to your digestive system which helps naturally cause a bowel movement.

Magnesium Oxide Supplement Tablets

Parmed Pharmaceuticals

This medication is a mineral supplement used to prevent and treat low amounts of magnesium in the blood. Magnesium is very important for the normal functioning of cells, nerves, muscles, bones, and the heart. Usually, a well-balanced diet provides normal blood levels of magnesium. However, certain situations cause your body to lose magnesium faster than you can replace it from your diet.

CompleteRX Cup™ First Crush

First Wave

Accurate Dosage. CompleteRX Cups are the only cups available with a textured surface on them. This allows a direct grinding action on the pills unmatched by other cups or bags. Only cups allow the caregiver to crush, mix and serve from the same container. When matched with our unique FDA cleared anti-static coating, the CompleteRX Cups help ensure more dosing gets administered to the patient.

Provon® Hand & Body Moisturizer

Gojo

The PROVON moisturizing hand and body lotion is a water-based lotion with petrolatum and skin conditioners that helps relieve dermatitis symptoms by moisturizing the skin. The skin conditioners (including petrolatum, glycerin, and dimethicone) help keep skin hydrated, and isopropyl myristate and cetyl alcohol help lubricate the skin for a smooth feeling. The lotion is compatible with latex gloves to reduce the risk of glove degradation, and with CHG (chlorhexidine gluconate) anti-pathogen to reduce the risk of deactivating interference.

Atrac-Tain® Moisturizer

Coloplast

Atrac-Tain® Cream offers superior moisturizing relief for severely afflicted, dry, scaly and cracked skin conditions. 10% urea moisturizes by increasing the water binding capacity of the epidermis (stratum corneum) and attracts water to dry skin cells. 4% alpha hydroxy acid retains moisture, increasing skin elasticity and resistance to cracking. Also acts as an exfoliant, which facilitates sloughing of dry skin cells. Softens and soothes skin by slowing the evaporation of moisture without blocking pores (non-occlusive emollients). Fragrance- and preservative-free, formulation is safe for use on sensitive skin. Latex, nitrile and vinyl glove compatible. Clinically proven to help prevent skin dryness which can lead to an increased risk of foot ulcers. CHG compatible.

Description	Packaging	Sold By	Item ID
2 oz. Tube	12 Tubes/Case	Tube	1802
5 oz. Tube	12 Tubes/Case	Tube	1814

Sween® A&D Moisturizer

Coloplast

Sween® Cream's non-occlusive formula absorbs quickly into the skin and will not interfere with the adhesion of tape or ostomy appliances. Effective, soothing preparation for use on red, sore or irritated skin. Absorbs quickly into the skin and will not interfere with the adhesion of tape. Immediately helps restore dry, fragile skin at risk of cracking, especially around contact points like heels and elbows. Relieves the redness and irritation associated with incontinence. Suitable for neonatal use.

Carmex® Ointment Lip Balm

Carmex

Carmex adds natural emollients to your lips, while locking in your own body's moisture to help protect against chapping and cracking. Lanolin, for example, is a natural substance that locks in moisture. The lanolin in Carmex is easily absorbed into the delicate skin of your lips, where it provides a temporary barrier against the drying effects of wind, heat and cold.

Shiley™ XLT Disposable Inner Cannula

Medtronic

Shiley™ XLT Extended-Length Tracheostomy Tubes give you an economical, off-the-shelf alternative to custom tracheostomy tubes for patients with anatomical challenges. Flexible, disposable inner cannula has a unique locking ring that fastens it securely to the outer cannula. Flexible, soft, free-swiveling neck flange improves patient comfort and provides easy inspection of the stoma site. Outer cannula tip-to-tip radiopaque line facilitates proper tube positioning. High volume, low pressure cuff meets all published cuff criteria.

Description	Packaging	Sold By	Item ID
Size 6, 95mm Length, 6mm I.D. x 11mm O.D.	Each	Each	60XLTIN

Shiley™ Cuffless Tracheostomy Tube

Medtronic

Shiley™ Reusable Cannula Cuffless Tracheostomy Tubes are designed for general pulmonary hygiene and for use with spontaneously breathing patients. Inner cannula with closed lumen and low-profile connector, supplied with CFS, directs breathing through the upper airway. Inner cannula with open lumen and low-profile connector reduces bulk at stoma. Inner cannula with integral 15mm twist-lock connector permits connection of ancillary equipment and is translucent for easy inspection. Smooth, rounded-tip obturator facilitates insertion. Low profile inner cannula minimizes tube profile for long term care. Swivel neck flanges improve patient comfort.

UC Strip® Catheter Tubing Fastener

Derma Sciences

UC Strip® is a latex-free, economical, one-piece catheter/tubing fastener. This flexible adhesive fastener secures urinary and gastrostomy catheter tubing to the patient without the irritation or tissue trauma caused by other tapes. UC Strip® is made of a flexible material with a skin-friendly adhesive. Comfortable for the patient, the fastener allows limited side-to-side movement while it prevents the tubing from being pulled out.

Description	Packaging	Sold By	Item ID
Adhesive Strips	20 Each/Box, 10 Boxes/Case	Box	20

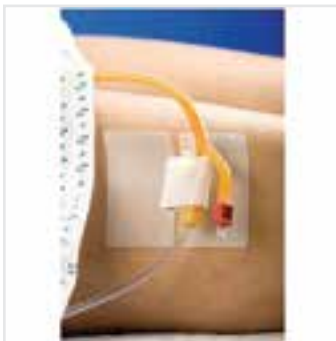

Dale® Velcro Leg Strap

Dale Medical

All Types of Foley Catheters, Including New Generation of Silicone and “Teflon” Coated. Fits most adults and children without sliding up and down the leg. 2 inches wide and can be used with universal indwelling catheters.

Description	Packaging	Sold By	Item ID

Curity™ Ultramer™ Hydrogel-Coated Latex Foley Catheter

Medtronic

Ultramer™ hydrophilic coating provides superior lubricity and increased biocompatibility. Maintains lubricity by absorbing mucosal fluid, providing easy insertion and removal with enhanced patient protection. The hydrophilic coating and smooth edges reduce friction, ease the insertion and removal process, and also minimize urethral tissue damage. Ribbed balloon provides excellent symmetry and strength. Smooth-edged and for long-term use. Beveled eyes provide optimal drainage without weakening the tip. 2-way. Sterile.

Adhesive Remover UniSolve Wipe

Smith & Nephew

Formulated with aloe to reduce adhesive trauma to the skin by thoroughly dissolving dressing, tape and appliance adhesives. Ideal for removing ostomy faceplate adhesive bandages as well as acrylic and hydrocolloid based adhesives. Does not contain CFCs (chlorinated fluorocarbons) or preservatives. Non-sensitizing, non-irritating. Thoroughly dissolves adhesives reducing trauma to the skin caused by frequent or aggressive tape adhesion.

Medipore™ Adhesive Bandage Dressing

3M Healthcare

An all-in-one sterile dressing that features a breathable soft cloth tape backing with a unique non-adherent pad. Highly conformable dressing is easy to apply, conforms to body contours, and flexes with movement or swelling. Unique non-adherent pad promotes normal wound healing with less pain and trauma. Dressing provides excellent adhesion, yet is gentle to the skin. Sterile.

Tegaderm™ + Pad Film Dressing with Non-Adherent Pad

3M Healthcare

This composite dressing is a sterile, waterproof bacterial barrier which consists of a non-adherent absorbent pad bonded to a larger thin film transparent dressing. Breathable film allows skin to function normally with good exchange of moisture vapor and oxygen. Unique, non-adherent pad won't stick to the wound, allowing normal wound healing processes to occur. Sterile.

Primapore® Absorbant Bandage Dressing

Smith & Nephew

The thick pad minimizes fluid strike-through and helps to protect the wound from trauma. The wound contact layer enables the passage of blood or exudate into the highly absorbent pad while maintaining a good healing environment and minimal pain on dressing removal. The protector paper, which is slit across the width of the dressing, enables quick application without the risk of touching the absorbent pad or adhesive area with fingers or forceps. Soft breathable cover. Sterile.

3-1/8" x 6"	20 Each/Box, 10 Boxes/Case	Box	66000318

Telfa™ Ouchless Adhesive Dressing

Medtronic

Telfa™ "Ouchless" Adhesive Dressings are made of highly absorbent cotton fabric bonded on both sides with perforated, non-adherent film. Won't disrupt healing tissue by sticking to wound. Kendall Telfa™ Ouchless Adhesive Dressing has ideal moisture vapor transmission rate that helps control fluid loss and provide moist, wound-healing environment. Perforated carton makes for easy dispensing. Adhesive strips are convenient and minimize roll up. Sterile.

Surgilast® Tubular Elastic Bandage Retainer

Derma Sciences

A tubular, elastic, stretch net designed to serve as a secondary dressing. It applies gentle pressure to keep bandages or other medical devices securely in place without adhesive tape. Ideal for securing burn or post-op dressings, hot or cold packs, IV tubes, incontinence pads and decubitus ulcer dressings. Easy to customize. Allows maximum air-flow. Made from a high-quality nylon and rubber mix. Washable and reusable. Knitted in a continuous, seamless band and stretches well beyond its relaxed length and diameter, applying gentle pressure to keep bandages securely in place. Skin-contact surface is smooth and non-loopy, offering greater patient comfort. Non-sterile.

No-Sting Skin-Prep™ & Skin-Prep Wipe

Smith & Nephew

A liquid film-forming dressing that, upon application to intact skin, forms a protective film to help reduce friction during removal of tapes and films. Skin-Prep can also be used to prepare skin attachment sites for drainage tubes, external catheters, surrounding ostomy sites and adhesive dressings. Fast and easy to use, only one coat is required, so less product is used per application. Removes easily using skin cleanser or soap and water, so unsanitary residue isn't left in or around the wound area. Applies easily, even on awkward areas such as elbows, knees, and heels.

Description	Packaging	Sold By	Item ID
Individually Wrapped (No-Sting*)	50 Each/Box, 20 Boxes/Case	Box	59420600
Individually Wrapped	50 Each/Box, 20 Boxes/Case	Box	420400

Webcol™ Preppies Skin Barrier Wipe

Medtronic

Preppies™ Skin Barrier Wipes not only provide an effective barrier between skin and adhesive products, but also help protect against feces, urine, chemical irritants and gastrointestinal fluids. Barrier solution leaves a breathable film over skin which helps reduce excoriation due to continual use of adhesives. Forms an effective barrier to gastrointestinal fluids and other contaminants, lessening skin irritation. Ideal for protecting perineal and ostomy sites from feces and urine.

Cavilon™ Advanced Skin Protectant

3M Healthcare

The product's superior barrier performance allows/enables damaged skin to heal. The protective barrier prevents, stops and reverses the effects of IAD. Due to its ability to attach /adhere to wet, weeping (denuded) and/or dry skin and its exceptional barrier properties, the product does a superior job of protecting skin from irritants. Protective barrier reduces pain associated with IAD and IAD care. Forms a transparent coating on the skin.

AlgiSite® M Alginate Dressing

Smith & Nephew

When used in a moderate to highly exuding wound, the dressing forms a soft gel, which does not adhere to the delicate healing tissues in the wound bed. The dressing can be easily lifted out of the wound in one piece, or washed out with saline. Very soft and conformable, allowing it to be molded, folded or cut to meet a wide range of wound shapes and sizes. All fiber based alginates release fibers when handled, however the advanced bonding technique employed in Algisite M greatly reduces this. The production of a gel by the action of exudate on the alginate fibers creates a moist wound environment at the wound surface, this helps prevent eschar formation and promotes an optimal moist wound environment. Absorbs 13 times its own weight in exudate, which allows the dressing to remain in the wound for up to 7 days, depending on the nature of the wound and the volume of exudate. Sterile.

Tegaderm™ High Integrity & High Gelling Alginate Dressing

3M Healthcare

Tegaderm™ High Integrity and High Gelling Alginates provide clinicians with a choice of products to meet their needs for moderate to heavily exuding wounds. Both types of alginate dressings become a gel-like consistency as they absorb exudate. Alginate fibers absorb up to 20 times their own weight in exudate. Highly conformable. Ideally suited for the management of moderately to heavily exuding partial and full-thickness wounds. Sterile.

OpSite™ Post-Op Transparent Film Dressing

Smith & Nephew

The revised OPSITE Post-Op dressings combine the features of the current OPSITE Post-Op dressings with the high MVTR REACTIC \diamond hydrophilic polyurethane film used to manufacture OPSITE IV3000 \diamond Transparent Adhesive Film Dressings. The patented REACTIC film is 3 to 8 times more permeable to water vapor than standard film dressings. It can "switch" in the presence of moisture allowing excess moisture to transpire off. OPSITE Post-Op is highly conformable, even over the most awkward body contours. Its extensibility does not restrict movement, ensuring that it is comfortable for the patient. The unique dressing carrier keeps the film firm, allowing easy application. Sterile.

4" x 4-3/4"	10 Each/Box, 10 Boxes/Case	Box	66000710

OpSite™ FlexiGrid Transparent Film Dressing

Smith & Nephew

OPSITE FLEXIGRID is a transparent, adhesive film, with a unique wound measurement grid. The film is moisture vapor permeable, conformable and extensible. It is widely used to provide a moist wound healing environment for superficial wounds; it is also ideal for use as a secondary dressing. The unique and novel roll format enables rapid and economical use of the OPSITE film to create comfortable, waterproof fixation for dressings. Sterile.

Tegaderm™ Transparent Film Dressing

3M Healthcare

Tegaderm™ transparent dressings can be used to cover and protect catheter sites and wounds, to maintain a moist environment for wound healing, as a secondary dressing, as a protective cover over at-risk skin, to secure devices to the skin and as a protective eye covering. They can also be used to provide a moist wound environment to facilitate autolytic debridement. Tegaderm™ HP Transparent Dressing offers greater adhesive power for a strong hold, even under challenging conditions including hot, humid environments. Sterile.

Allevyn® Non-Adhesive Foam Dressing

Smith & Nephew

Smith & Nephew Allevyn™ Non-Adhesive Hydrocellular Polyurethane Dressing has a trilaminate structure that is comprised of a non-adherent wound contact layer, a hydrocellular core and a breathable outer surface. The outer, pink layer allows the formation and maintenance of a moist wound environment at the wound surface that helps to prevent eschar formation. The pink film is also waterproof and aids in the prevention of bacterial contamination. Highly absorbent, central, hydrocellular layer. Lack of adhesive allows the use of the most suitable retention method. Conformable and can be cut to suit various wound sizes and locations. Soft and cushioning, it provides excellent comfort. Can stay in place for up to 7 days. Easy to use. Sterile.

Tegaderm™ Silicone Foam Border Dressing

3M Healthcare

Tegaderm™ Silicone Foam Border Dressing. Gentle, absorbent and secure silicone foam border dressing easily handles high to low exuding wounds. Stays in place, yet removes gently, making it ideal for fragile skin. Dressing absorbs/manages low to high levels of exudate, protects periwound skin and maintains "moisture balance. Dressing does not adhere to the wound bed and periwound skin (undisturbed healing environment). Provides a water resistant seal while dressing is intact. Allows showering. Adhesive film border is thin and has a low profile to minimize edge roll. Can be worn for up to 7 days on skin and compromised skin. Sterile.

Medihoney® Calcium Alginate Dressing

Derma Sciences

Occlusive Medihoney® Calcium Alginate Dressing contains 95% active, manuka (leptospermum) honey. It provides moist, occlusive environment conducive to optimal wound healing. As wound exudates are absorbed, alginate forms a gel, making dressing easy to remove. Derma Medihoney® Calcium Alginate Dressing is easy to use and apply. Leptospermum honey has unique characteristics that make the dressing ideal for use on chronic or acute wounds. Due to versatility and lack of toxicity, this dressing can be used in all stages of wound healing. Can also be used as an important component of wound bed preparation. Sterile.

Medihoney® Hydrocolloid Dressing

Derma Sciences

Medihoney® Hydrocolloid Dressing is a unique line of dressing that contains active, manuka/leptospermum honey with unique qualities that make it ideal for the management of chronic wounds, acute wounds and burns. Effective on hard-to-heal wounds and burns, and in helping to debride wounds as well as keep wound beds clean of necrotic tissue. Derma Sciences Medihoney Hydrocolloid Dressing comes without an adhesive border. Non-toxic, natural and safe. Easy to use. Highly absorbent, for excellent exudate management. Due to high percentage of leptospermum honey it is able to work in the presence of wound fluid, blood and tissue, thus promoting an optimal healing environment. Sterile.

Replicare® Hydrocolloid Dressing

Smith & Nephew

REPLICARE is a hydrocolloid dressing that contains a dense concentration of absorbent material in a thin dressing for superior absorption in the management of exuding wounds. The one-handed application system will not stick to gloves. Film exterior that is waterproof and aids in prevention of bacterial contamination. Top film can be wiped clean easily. Beveled edges help keep the dressing from sticking to clothing or bed linens, reducing the risk of leakage. Sterile.

DuoDERM® CGF™ Border Hydrocolloid Dressing

Convatec

DuoDERM® CGF™ Border Sterile Dressing is for use on partial and full thickness wounds in “hard to dress areas.” The wide 3/4 inch adhesive foam border does not require additional taping and allows for a longer wear time. DuoDERM® Dressings can be worn for up to seven days. The dressings are highly conformable – and can be easily and gently molded into place. Sterile.

DuoDERM® CGF™ Hydrocolloid Dressing

Convatec

DuoDERM® CGF™ Sterile Dressing is a hydrocolloid, moisture-retentive wound dressing used for partial and full-thickness wounds with exudate. Indicated for use on dermal ulcers including full-thickness wounds, leg ulcers, superficial wounds, partial thickness burns and donor sites. DuoDERM® Dressings can be worn for up to seven days. The dressings are highly conformable – and can be easily and gently molded into place. Sterile.

DuoDERM® CGF™ Extra-Thin Hydrocolloid Dressing

Convatec

DuoDERM® CGF™ Extra Thin is a flexible, conformable and moisture-resistant wound dressing that protects susceptible areas anywhere on the body. Translucent backing is designed to prevent needless dressing changes that can cause discomfort and disturb healing. Maintains a moist wound healing environment and is recommended for use on skin tears, dry to lightly exuding dermal ulcers, superficial wounds and post-op wounds. Sterile.

4" x 4"	10 Each/Box	Box	187955

Comfeel® Ulcer Care Hydrocolloid Dressing

Coloplast

This dressing promotes moist, wound-healing, absorbs exudates and allows natural debridement. Microthin edges reduce the need for taping and lessen chance of edge roll. Prevents irritation of the sensitive skin surrounding partial thickness wounds. Provides a moist wound environment that protects wounds from cooling and bacteria. Does not contain alginate. “No-touch” system allows one-handed application, even with gloves. Conforms easily to body contours. Removes easily and is residue-free. Soft and flexible. Balanced adhesive formulation for maximum wear-time yet allows for gentle removal. Sterile.

Description	Packaging	Sold By	Item ID
1-1/2" x 2-1/2"	30 Each/Box	Box	3233

Comfeel® Plus Ulcer Hydrocolloid Dressing

Coloplast

Comfeel® Plus hydrocolloid dressings are sterile and feature highly absorbent hydrocolloid with alginate for superior exudates management. The adaptable polyurethane top film contributes to better exudates management allowing pores to open for more evaporation when there is heavy exudates and close to maintain a moist environment when there is little exudates. “No-touch” system allows for easy application while wearing gloves. Skin-friendly adhesive keeps the dressing in place yet can easily be removed. Sterile.

Description	Packaging	Sold By	Item ID
6" x 6"	5 Each/Box	Box	3115

Comfeel® Plus Transparent Thin Hydrocolloid Dressing

Coloplast

Comfeel Plus Transparent can be used for management of no-to-low exuding chronic wounds and superficial acute wounds in the final stages of wound healing. Comfeel Plus Transparent may be used for superficial burns, superficial partial-thickness burns, donor sites, post-operative wounds and skin abrasions. The dressing can stay on the wound for up to 7 days depending on the specific wound characteristics. Sterile.

Solosite™ Hydrogel Dressing Conformable

Smith & Nephew

Designed to keep the gel in intimate contact with the wound bed. Ideal for packing into and around the sides of the wound. While wound gels alone tend to pool at the base of deeper wounds, leaving portions of the wound bed uncovered, SoloSite Gel Conformable maintains close contact of the wound surface and the gel.

Description	Packaging	Sold By	Item ID

Acticoat™ Antimicrobial Barrier Burn Dressing

Smith & Nephew

Smith & Nephew Acticoat™ Burn Dressing with Nanocrystalline Silver is an extended use silver antimicrobial barrier dressing which remains effective for up to seven days. The silver coating rapidly kills a broad spectrum of bacteria in as little as 30 minutes and protects the wound site from bacterial contamination while the inner core helps maintain the moist environment that can facilitate wound healing. Easier and less painful to remove, making it a dressing of choice. Not compatible with oil-based products, such as petrolatum. Can be used on extensive body surface area wounds. Sustained release of silver for 3 days. Prevents and reduces infection. Assists faster healing. Sterile.

Allewyn® AG Gentle Border Adhesive Foam Dressing

Smith & Nephew

Smith & Nephew Allewyn™ Ag Gentle Border Silicone Gel Adhesive Silver Wound Dressing features triple-action technology that absorbs, retains, and transpires exudates to provide optimal fluid management. Provides an optimal, moist wound environment for the promotion of faster closure and gentle adhesive allows for less painful dressing changes. Minimizes pain to the patient and trauma to the wound at dressing change. Rapid and sustained antibacterial action. Optimal exudate management. A unique, two-in-one solution for exuding, chronic wounds. Sustained antibacterial activity for 7 days. Longer wear time. Sterile.

Allevyn® AG Non-Adhesive Foam Dressing

Smith & Nephew

Smith & Nephew Allevyn™ AG Non-adhesive Silver Barrier Dressing provides an effective barrier to microbial contamination protecting the wound from invasive pathogenic micro-organisms, thus assisting faster healing. It reduces risk of excess fluid at the wound site as excess wound fluid is transpired away more quickly. Prevents healing tissue from growing into the dressing minimizing pain on removal. Optimal exudate management. Easy to use with a wear time of up to 7 days. Non-adherent, wound contact layer. Breathable waterproof and bacteria proof top film. Low allergy adhesive and protects from leakage. Top film switches to become more breathable in the presence of fluid. Sterile.

Hydrofera Blue® Bacteriostatic Foam Dressing

Hollister

Easy-to-use, highly absorptive external dressings for the local management of wounds such as ulcers (pressure, venous stasis, and arterial), donor sites, abrasions, lacerations, radiation burns, post-surgical incisions, and other wounds caused by trauma. Absorb wound exudate and inhibits the growth of bacteria that can lead to infection. Physically binds harmful endotoxins which can aid in patient comfort. Pulls bacteria-laden exudate up and away from the wound which may facilitate healing and aid in patient comfort. Maintains similar or superior absorbency as compared to other highly absorptive dressings. Sterile.
